BHMT

Product: BHMT

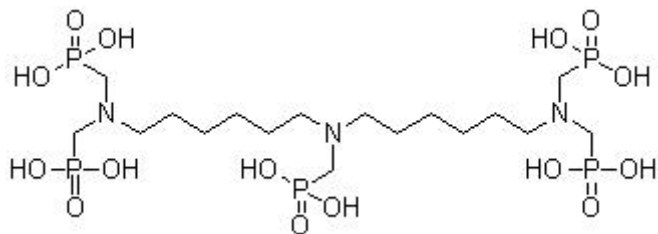

Code: KW-150

CAS NO.:34690-00-1

Molecular Formula: C₁₇H₄₄N₃O₁₅P₅

Chemical Name: Bis(hexamethylene)triaminopenta(methylene-phosphonic acid)

Chemical Structure:

Specification:

Appearance	Dark amber liquid
Active Content as acid, %	45min
Chloride, as Cl- (%)	8.0max
PH value (1% water solution)	2.0max
Iron, as Fe (ppm)	65max
Density(20° C),(g/cm ³)	1.20min

Application: A scale and corrosion inhibitor for cooling circulation water units and boilers;
Metal chelate agent and color fixing agent for print and textile; Complexing agent for electron plate and water scale cleaning agent for metals.

Package & Storage: 250kg in a plastic drum, 1250kg/1000L IBC and stored in cool and dry place. Storage life is 1 years.
